VALUABLE VEGETABLES

Biodynamic agriculture begins with the seed. This millennia-old heritage of our ancestors is cultivated with care and a lot of effort by Demeter farmers. The typical characteristics of the varieties are preserved in a natural way. With the understanding that plant and nature develop in harmony, the farmer maintains the integrity of the plant. The results are vegetables that are rich in vitamins and vital substances and are characterized by their intense flavor. In order to preserve these qualities, our vegetables are washed immediately after harvesting and gently shock-frozen loosely rolling.

ENJOY NATURALLY

In order to give our fruit the typical taste of the variety, it needs optimal weather conditions and the right harvest time. That is why we source our fruit from the growing regions where the respective varieties are native. Through the biodynamic know-how, the careful care of the plants and the experience of our farmers, our fruit varieties can ripen under optimal conditions. After the harvest, the fruit is immediately shock frozen. This is a particularly gentle preservation method that preserves the important vitamins of the fruits. This enables us to offer you fruits with a full aroma and with an optimal ripeness for your dishes.

POTATO PRODUCTS

Only a vital and healthy potato plant, which is full of nutrients, will produce tasty and nutrient-rich potatoes. In the Demeter philosophy a soil rich of humus is indispensable for a healthy plant. Medicinal plant preparations and specifically compost fertilization, as well as a crop rotation, make the soil an important component of an entire organism. It forms the fertile basis for healthy potato plants. This approach is also consistently implemented in the processing.

FRENCH FRIES - A ROYAL DISCIPLINE

Only the best potatoes are suitable for French fries. Only potatoes with the ideal starch content are accepted for processing into Demeter chips. The controlled, consistently gentle processing preserves vitamins and minerals as well as important secondary plant substances. The production process of our Fries is free from the usage of any sugars or isolated additives. A high quality and ready-to-use product requires close and trusting co-operation between grower and manufacturer.

DUMPLINGS

"Big bulbs don't go into little pots, big thoughts don't go into little heads," is a saying. Since the beginning of our work as Demeter-Felderzeugnisse, we have striven for authenticity in our products, both the basis of the product in the field and the end product on your guests' plates. That is why we work with traditional recipes for our dumplings and maintain our demand to produce free of additives and aids. A food can only become as much as it once was in the field.

EASY TO PREPARE AND SIMPLY DELICIOUS

Our casseroles, cannelloni and lasagnes are practical to use and combine good taste with high quality. The raw materials are obtained from regional cultivation and processed by hand in a way that preserves their value. Only fresh ingredients, such as fresh pasta plates or tomato passata, are used in the production. In this way we not only preserve vitamins and minerals, but also the vital quality - for body, mind and soul. Naturally tasty enjoyment!

SIMPLE AND CREATIVE

Our tart flambée owe their tasty, crispy base to the traditional dough method with ingredients from purely organic farming. Thanks to the individual use of our soils, there are no limits to creativity. Cover the crispy, thin bases with bacon and onions in the traditional way or with vegetables in the vegetarian way. Spread with a vegetable cream and covered with vegetables, a vegan alternative is conjured up in no time at all. In this way, numerous savory, but also sweet variations can be created. There are no limits to creativity!

HOW YOU CAN TASTE RESPECT

The focus of every biodynamic farm is specie-appropriate animal husbandry. For good reason, as animals are the key to a biodynamic circular economy. They turn grass and cereals into fertilizer and thus contribute decisively to the preservation and development of a living soil. Feeding and the care of the animals determine the daily farm life as rhythmically recurring tasks. Our farmers take the responsibility towards their animals very seriously. On the basis of animal husbandry without fast fattening performance and an attitude appropriate to their nature, we guarantee high quality products.

FISH IN HARMONY WITH THE SEA & FISHERMEN

We consider fish stocks to be a sustainable resource to be protected and to serve as a source of food for humans in the long term. Therefore, the fish for our fish products comes from sustainable ecological aquaculture or environmentally friendly fishing by small fishermen in precisely defined fishing areas. These aspects guarantee tasty fish without endangering the fish stocks.

SEAFOOD FROM SUSTAINABLE BIO-AQUACULTURE

The special quality and unique taste of our mussels is due to the enormous nutrient richness of the Gulf Stream and the strong tides off the Galician shores. Our shrimps are kept in ecologically intact ponds with plenty of space. Thus, they find a large part of their food in the form of algae and plankton themselves.

HIGH-QUALITY CANNED FISH AND SEAFOOD FROM SUSTAINABLE FISHERIES

The fish for Pan do Mar is caught in small fishing boats near the coast, using sustainable traditional methods. In addition, fish and seafood are refined exclusively with ingredients from organic farming. The extraordinary products are filleted and filled into cans or high-quality glassware by hand. Original Galician recipes make the products a pleasure to eat with bread, pasta or in sauces or salads. Try the unique taste of the treasures of the sea by yourself!
